

EMERGENCY PREPAREDNESS KIT

Stay ahead of a power outage by putting together an emergency preparedness kit with the following items:

WATER:

Have one gallon of water per person per day (three-day supply for evacuation and a two-week supply for home). Consider freezing bottles of water to repurpose later.

FOOD:

Have nonperishable, easy-to-prepare items (three-day supply for evacuation, two-week supply for home).

FLASHLIGHT:

Use a flashlight rather than candles because of the extreme risk of fire. See our custom Complete Power Resources handheld flashlight for reference.

PORTABLE RADIO:

Have a battery-operated or hand-crank emergency portable radio: A NOAA weather radio is a great option.

FANS, EXTRA BATTERIES, & PORTABLE CHARGERS:

Keep battery-powered and operated fans, extra batteries, as well as portable chargers for your electronic devices on hand.

MEDICAL & SANITATION SUPPLIES:

Have a first aid kit, medications (seven-day supply), and medical items. Sanitation and personal hygiene items are highly encouraged.

PERSONAL DOCUMENTS:

Copies of personal documents: medication list and pertinent medical information, deed/lease to home, birth certificates, and insurance policies are good to have on hand.

EMERGENCY CONTACT & EXTRA CASH:

Have family and emergency contact information and extra cash available.
